Device Approval

David Naggar
VP, Technology & Business Development
Spruce Environmental Technologies, Inc.
3 Saber Way
Ward Hill, MA 01835

Dear Mr. Naggar:

The AARST National Radon Proficiency Program has completed a review of RadonAway’s RadStar ALPHA Series CRM application for Device Approvals.

Based upon a review of the application and material submitted, approval for listing of these devices by the National Radon Proficiency Program (NRPP) has been granted.

The devices will be listed by the NRPP on our website with the following reference codes and numbers:

CR– RadStar Alpha Series

Device Code	Device Description	Standard or Analytical
CR - 8309	RadStar Alpha 310	Analytical*
CR - 8310	RadStar Alpha 516	Analytical*
CR - 8311	RadStar Alpha 830	Analytical*

Attached is an NRPP Device certificate which remains in effect unless you alter the device significantly.

The device listing is approval for use of this device by NRPP and C-NRPP professionals and licensed professionals who conform to the QA/QC requirements of their certification.

Cordially,

Dallas Jones

Executive Director
AARST-NRPP
